SUMMARY

Junior Data Analyst professional with entry-level experience in data analysis and dashboard development, proficient in SQL and Power BI. My key achievements include designing a relational database analyzing 100K orders for Olist and creating an interactive Power BI dashboard for IPL Century Performance. Seeking a Junior Data Analyst position, where I bring my data analysis and dashboard development skills to support your mission of generating insights and supporting data-driven decision-making.

Skills

SQL: Joins • Subqueries • CTEs • Window Functions • Aggregations

Python: Pandas • NumPy • Matplotlib • Seaborn • EDA • Data Cleaning

Power BI: Data Modeling • DAX Measures • Interactive Dashboards • Visualization

Excel: Advanced Formulas • Pivot Tables • Power Query • Dashboards

Tools & Platforms: Jupyter Notebook • Excel • Power BI • MySQL

Projects

Olist-Brazilian-E-Commerce-SQL-Analysis

<https://github.com/Anudeep-Marapally/Olist-Brazilian-E-Commerce-SQL-Analysis>

- Designed and structured a relational database using MySQL, analyzing approximately 100K orders across customers, orders, products, payments, reviews and seller data.
- Performed SQL-based data cleaning and quality validation, identifying duplicate records, missing values, invalid dates and inconsistent product categories.
- Analyzed key business metrics, including Average Order Value (BRL 153.07), delivered order percentage, payment method distribution and customer purchasing patterns.
- Validated order lifecycle and delivery timelines by resolving date inconsistencies, assessing order approval, delivery and review record relationships.

Retail Sales Performance Analysis

https://github.com/Anudeep-Marapally/Retail_Sales_Performance_Analysis

- Identified data quality issues, maintained a correction log and cleaned missing values using appropriate business rules and Excel formulas
- Built multiple Pivot Tables to analyze customer spending, seasonal sales, payment methods, product categories and platform performance
- Cash, Digital wallet and credit card are performing equally, suggesting an opportunity to target additional sales with cashback and offers
- Push Online Marketing with Pamphlets in the store, which can lead more Profits on Online marketing with less investment

IPL Century Performance Dashboard

https://github.com/Anudeep-Marapally/IPL_Century_Performance_Dashboard

- Designed an interactive multipage Power BI dashboard with navigation buttons KPI cards, and year/month slicers for dynamic analysis
- Virat Kohli recorded 8 centuries, highlighting his consistency
- Most number of centuries was in Wankhede Stadium (17 centuries out of 108 centuries) which is approx.16% of overall centuries
- Chris Gayle recorded the highest individual score of 175**
- Most number of Centuries registered in 2024 (14)
- Royal Challengers Bengaluru recorded the highest number of centuries (19), while approximately 76% of centuries resulted in team victories

Zara Sales & Revenue Analysis

https://github.com/Anudeep-Marapally/Zara_Sales_Revenue_Analysis

- China generated the highest revenue, followed by Bangladesh
- The women's section generated approximately twice the revenue of the men's section, indicating stronger revenue contribution from women's products
- Aisle, front and end of the store. Product positioning not giving enough margin, suggesting give more values on Aisle to get more revenue

Education

Vardhaman College of Engineering

2016 - 2020

Bachelor's Degree B.Tech in Mechanical Engineering | CGPA: 8.00 / 10.00

Strengths

-  Strong analytical and problem-solving skills
-  Ability to convert business questions into data-driven insights
-  Comfortable working with large datasets
-  Clear understanding of end-to-end data analysis workflow

ADDITIONAL INFORMATION

-  Open to Data Analyst / Junior Data Analyst / Business Analyst roles
-  Willing to learn and adapt to new tools and business domains (Immediate joiner)
